Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The word "alternatively" makes the claim indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6, 10 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Markbreiter et al., (4,942,734). Markbreiter et al., disclose a power generator (generator of electricity comprising a gas turbine 10 connecting a steam turbine 24 connecting an refrigeration (ammonia) absorption unit 66 and operating the refrigeration unit 66 with waste heat produced by the produced by the gas turbine with its waste gas 19 which produce high pressure steam in a steam boiler 21 and supplied to a high pressure side of the steam turbine 24, the seam turbine 24 supplies at a low pressure to the absorption unit 66, this steam is also being used to heat amine solution in a reboiler 53 . See Fig.1, column 1, line 50 to column 3, line 35. regarding claim 10, Examiner considers amine solution contains water and water is heated with the solution.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-9 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Markbreiter et al. Markbreiter discloses the invention substantially as claimed except building or plurality of buildings. It is obvious when a refrigeration or power plant is installed in building and for buildings for supplying power and refrigeration.

Allowable Subject Matter

Claims 11-12 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
